## Safety Camera Installation & User Guide

Version 1.5

## Connecting your Navigation System to your PC

Your Navevo navigation product comes with a six month trial of safety camera warning software.

In order for you to be able to install your free six months trial you will need to unlock your software using the subscription tool (subscription\_tool.exe) downloaded with this user manual.

First you will need to download and install Microsoft Activesync to enable you to connect your ProNav or BBNav to your PC. If you are using Windows Vista on your PC you do not need to do this as it comes complete with a version of Activesync already.

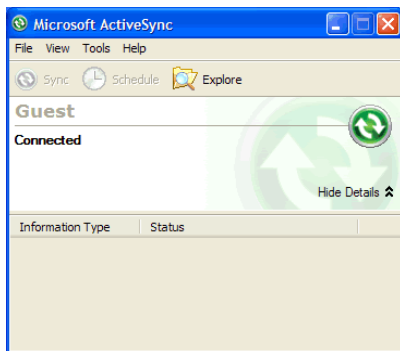

You can obtain a copy by clicking on this link to download:-

[Click Here to Download Microsoft Active Sync](#)

Once you have downloaded Activesync, follow the installation instructions carefully and only connect your device using the USB supplied when prompted to do so.

Once installed, make sure that your ProNav or BBNav is connected to your PC and that Activesync has recognised the device and is showing it as 'Connected' (as below).

Now you have completed the Activesync installation you will can now update your subscription to unlock your six month trial of the safety camera warning software.

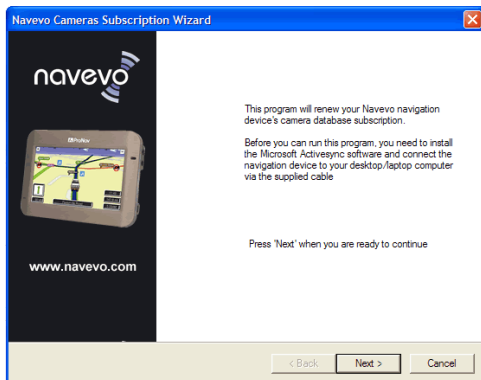

If you are having difficulties with Windows Vista installing your navigation system, please [Click Here](#) for a trouble shooting guide.

You are now ready to install the safety camera trial.

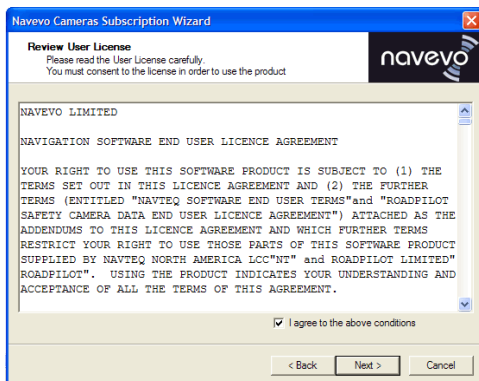

### **Installing your Free Six Month Trial (all Navevo Products)**

With the navigation device connected to your PC, make sure that you have the device switched on but make sure that you are NOT in the navigation software, just the device startup screen.

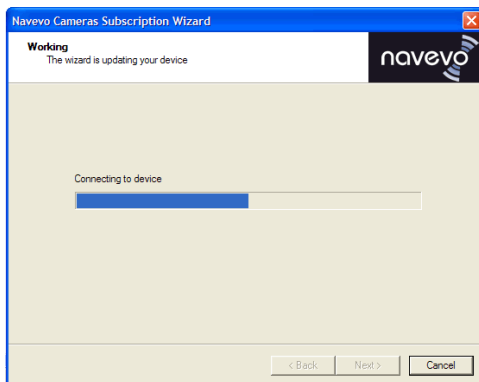

Next double click the **subscription\_tool.exe** file that you unzipped to your PC along with this manual earlier. This will start the subscription installer (see below).

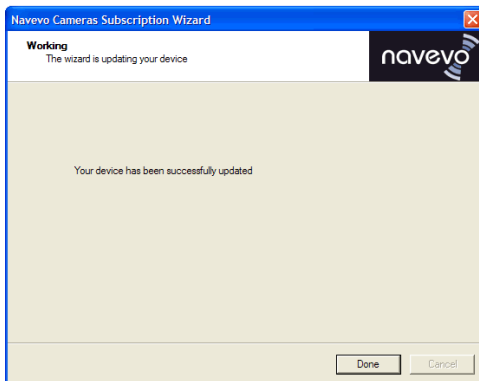

Click 'Next' and then read and accept the terms of the End User License Agreement by ticking the 'I agree to the terms of the software license' box.

Click 'Next' and the subscription will start loading to your device.

On completion, click 'Done' and the application will exit. You have now unlocked your safety camera warning software for six months.

## Known Issues

1. **When I try to install the subscription tool I get a 'Cannot remove obsolete file' error message.**

This occurs when your SD card is set to write protect (lock). Your SD card is located on the side of your hardware and to remove it push it in slightly and it will then pop out of the slot. On the side of the SD card you will notice a small white switch that can move up and down, move it to the unlock position. When re-inserting your SD card back into your navigation device make sure you have it the right way round, with the metal strips going into the device first. Once completed reconnect your device to your PC and run the update pack again.

2. **I still get the pop up reminder asking me to register even after I have run the subscription pack, why?**

If the pop up reminder asking you unlocked the software is still showing after you have run the subscription tool, start the navigation software, obtain a GPS signal and then exit the software. This should reset the device and when you start your navigation software again, the message should have disappeared.

## SAFETY CAMERA DATA END USER LICENCE AGREEMENT

PLEASE READ THIS ENTIRE LICENCE AGREEMENT CAREFULLY BEFORE DOWNLOADING THIS FIRMWARE and DATABASE UPDATE (COLLECTIVELY "DATA").
